Contact: Tim McNulty, 763/494.1700

Contract Amount: \$80 million

Architect: Hagen, Christensen and
McIlwain Architects

General Contractor: Kraus Anderson

Loucks Contact: Mike St. Martin

Project Description

Working with Boston Scientific since 1991, Loucks Associates has been involved in more than 25 different projects on its Maple Grove campus, including three major building expansions. Parking is a key element to protecting Boston Scientific's ability to grow, and is constantly evolving as additional space is warranted. The site also features Native American burial mounds and wetland mitigation as unique hurdles that needed to be overcome throughout the design process. This project is ongoing.
