Project Description

Loucks Associates provided landscape architecture, civil engineering and land surveying services for an extensive renovation of the historic State Fair Grandstand. The project is highlighted by a new performance area, seating and concession areas, and public plazas adjacent to the new elevator and stair towers. Loucks Associates worked closely with the project team, on a very aggressive schedule, to complete this significant facelift to a historic landmark on time and within budget.

Disciplines Represented

- Landscape Architecture
- Civil Engineering

Finished Site
