

Nordicware

St. Louis Park, Minnesota

Project Description

Loucks' work on the eight-acre Nordicware site consisted of four separate projects: 1) Loading dock reconfiguration, storm water pond design and access redesign; 2) Master site planning and redesign of the outdoor truck storage area to include limited truck storage space and employee parking; 3) Parking lot and infiltration area design for a new non-site retail store and 4) The existing parcels and newly acquired adjacent parcels were combined on one plat. Nordicware's campus includes office, manufacturing and shipping facilities.
